

Virtual Core Instruction Power Pack

- Close Academic Gaps
- Engage Reluctant Learners
- Accelerate Learning for All
- Social Emotional Learning
- Reduce Teacher Stress

Challenges and Repercussions of the Covid-19 Pandemic in Education

LSI's Virtual Core Instruction Power Pack is the just-in-time solution to the urgent and unique challenges the Covid-19 pandemic has introduced to education. Schools with already taxed resources and existing learning and performance gaps were forced to transition to remote learning scenarios across the nation.

Emerging research is already providing evidence that school closures have extensively widened existing gaps. Teachers prepared to teach in traditional classrooms now need additional skills in order to strengthen virtual core instruction, quickly engage students, bridge gaps, and propel schools to sustained, continuous improvement. The Virtual Core Instruction Power Pack empowers leaders, teachers, and students to overcome these challenges.

Overall benefits:

- Leaders are trained to coach and support teachers in their effective implementation of Virtual Core Instruction, and in the use of rich resources and tools to do so.
- PLC leaders are trained and supported to align their work to Virtual Core Instruction.
- Use of protocols to ensure the coaching process is replicable for sustained continuous improvement.
- Teacher leaders, principals, and instructional coaches are trained on how to coach and support teachers to continue and deepen their implementation including rich resources and tools.
- PLC leaders are trained and supported to align their work to support the implementation of Virtual Core Instruction.
- Use of protocols to ensure the coaching process is replicable to build instant capacity for the work.
- Quick and easy metric to measure and inform implementation.
- Principals receive personalized leadership coaching with weekly implementation actions to ensure effective leadership focus on shifting core instruction and transforming teaching and learning.

The Virtual Core Instruction Power Pack

The Virtual Core Instruction Power Pack is an intensive professional development experience that prepares teachers to effectively provide engaging rigorous core instruction in a virtual setting. The Power Pack is the equivalent of three days of expert-led live training delivered according to your needs in flexibly-delivered increments.

SEGMENT 1

Focuses on establishing virtual classroom procedures, student roles, and strong, trusting relationships in the virtual environment.

SEGMENT 2

Helps teachers create learning tasks for virtual breakout rooms and addresses topics such as the “mini lesson format” that provide more time and focus for student-centered learning with rigorous tasks.

SEGMENT 3

Fills the critical need of showing teachers how to monitor progress for real-time learning in a virtual classroom, including how to verify that individual students are learning, and what to do if they are not.

The techniques and strategies teachers learn in the Virtual Core Instruction Power Pack easily translate to both in-person and blended learning classroom settings, ensuring that as circumstances change, students and teachers experience smooth transitions and consistent, high quality instruction.

Testimonials

What Customers Love About LSI

Teachers are Engaged and Excited:

"We want to give a shout-out to Jennifer and Hasina for the great session we had! The two-hours went by so fast and all participants were highly engaged. Both of them are very knowledgeable and experienced presenters providing tools and strategies that the participants could utilize in their schools right away. Many positive comments were posted in the chat box such as "this is very helpful... today's session is great... it's extremely helpful." So, thank you so much and looking forward to the next two sessions!"

Education Program Specialist, Arizona

What You Will Get

Virtual Core Instruction Power Pack

The Virtual Core Power Package is evidence-based, deeply researched, delivered in real time, according to your budget and needs, by highly acclaimed and experienced educational professionals. Our methods are experiential, flexible, applicable across academic settings, and immediately actionable, with measurable results.

LSI's Virtual Core Instruction Power Pack is an intensive professional development experience that will prepare teachers to successfully provide engaging rigorous core instruction in a virtual setting, accelerating learning and preventing further gaps from occurring.

DAY 1	DAY 2	DAY 3
Establishing Relationships, Routines, Roles, and Rigor in Virtual Instruction	Creating Tasks Worthy of Student Groups in Breakout Rooms	Monitoring for Learning in a Virtual World
STRUCTURE OF THE DAY		
A		
2 hours of PD and application: Establishing positive relationships with and among students to foster productive team and class dynamics	2 hours of PD and application: Planning lesson content by identifying the standard(s) and corresponding learning target(s)	2 hours of PD and application: Verifying learning and providing micro-interventions or remediations
B

What Customers
Love About LSI

.....

**Solutions are Customized,
and Immediately Actionable:**

"Dr. Jensen and the team of presenters from LSI were fantastic. They met with us to find out what our specific needs were in our department and tailored a plan to help ramp up our staff developers and induction coaches so they would have the most current understanding of the FTEM model. Now, they are going to take that information and use it to share with the teachers in our district to have a greater impact on teachers changing their practices. The virtual sessions were engaging and informative for our participants. I would highly recommend LSI for their virtual offerings--they were just right and just in time support for our department."

Power Up Your Pack

Direct Support for Implementation,
and Continuous Improvement
Progress Monitoring Tools

We offer customizable product bundles that include live virtual coaching and progress monitoring support with tools for continuous improvement.

Following the completion of each professional development session, virtual coaching for implementation support is available. We offer packaged bundles that include 18 hours of direct virtual coaching. Our coaching sessions are uniquely designed to ensure the effective application of strategies in teachers' classrooms, and to help teachers, coaches, teacher leaders, and administrators support the implementation of new strategies from each component of the Virtual Core Instruction Power Pack. Coaching occurs in a small group setting and the outcome is actionable feedback specifically related to the implementation of each of the three sessions of this series.

Coaching to Support Teacher Implementation

Develop self-supporting, effective instructional teams

LSI equips self-supporting, effective PLCs through relentless monitoring of student evidences with an emphasis placed on implementation of the strategies learned through the PD. Users can easily choose an area on which to focus growth, collaborate with peers, and provide and receive coaching and feedback to ultimately deepen teacher practice.

PLC groups review strategies and resources from the PD and available data for planning purposes to inform next steps and mitigate the need for interventions by seeking to close the daily achievement gap. Coaching will include how to support PLC leaders as they work with teachers to develop virtual, standards-based lesson plans, review student work, analyze student data, and plan next steps.

Coaching can be delivered directly to PLCs or to PLC Leaders.

Oklahoma

Leadership Progress Monitoring for Implementation and Continuous Improvement

Use real-time classroom practice data to determine impact and inform next steps.

Progress Monitoring for implementation and Continuous Improvement through virtual classroom visitations with research-based indicators of practices. This is a powerful process to support and enhance implementation of the professional learning. It combines our trademarked practice of the Virtual RigorWalk with calibration training and use of the LSI Trend Tracker progress monitoring software, in an efficient, sustainable, and repeatable process for continuous improvement over time. Additionally, School Leadership Coaching is provided that builds the skills of the school leader to effectively monitor teacher implementation of strategies in daily classroom practice.

Through a series of classroom visits, the Virtual RigorWalk allows leaders to determine both conditions for learning and levels of rigor in the virtual learning environment. Through the support of an LSI School Leadership Coach, principals and leadership teams will use the LSI Trend Tracker to measure trending Virtual RigorWalk data on a continuous improvement path toward their goals.

Leadership coaching is a job-embedded and focused mentoring of the school leadership team so they can recognize rigorous instruction and evidences of student learning.
